

Make an Origami Bird, Part 1

1) Use a piece of A4 paper. Try to recycle, but make sure it is white on one side

2) Fold one corner diagonally to meet the other side, then fold over the remaining section to create a square.

3) Cut off the remaining section with scissors to make a square.

4) Fold in half.

5) Fold in half the other way.

6) Fold both of these folds back on themselves so they fold both ways.

7) Open it out, then fold in half diagonally. (if there is a printed side make sure it is facing upwards)

8) Fold in half diagonally again.

9) lift up the fold you just made and squash it down into a square, (the first folds you made help with this).

10) Turn the whole thing over and lift up a triangle of paper as shown.

Make an Origami Bird, Part 2

11) Squash down into a square, as in stage 9. Position so the open end of the paper is at the bottom, facing you.

12) Make a kite shape by folding the two sides into the centre

13) Turn it over and repeat.

14) Fold the top section over then fold it back up (do this both ways to make a good crease)

TIP: use your fingers here to help

15) Fold out the kite shape back into a square, lift up the first layer of paper and fold up on the crease you made in stage 14. fold in the folds you made for the kite in the opposite direction to make a tall diamond shape, then turn the whole thing over.

16) Repeat the fold in stage (15) to make a tall diamond shape.

17) fold over the first section of paper from right to left

18) fold up the triangle to create this shape then fold over the first section of paper from left to right

Make an Origami Bird, Part 3

19) Fold over the next section of paper from left to right, then fold up the lower triangle

20) fold the first section of paper from right to left

21) Gently pull out the point of paper that is in the middle of the folded triangle and squash flat so it stays

22) repeat on the other side until you get a kind of hat or crown shape

23) Squash one of the points down to make a head

Fold on this line

24) Fold a wing down at the angle shown

25) Turn it over and fold the other wing down so it lines up with the first wing

26) Here is your completed Origami flapping bird
